

C.A.S.T

A Coordinated Approach to Simulation Training

The **Southern Health Simulation Centre** is committed to being a dynamic centre of innovation and excellence committed to providing leadership in patient safety education, training and research.

C.A.S.T is a comprehensive, interactive 5 day program designed to assist **healthcare clinicians, educators/academics** and **technicians** to develop the knowledge and skills required to effectively deliver innovative simulation-based training programs.

This is one of the only courses of its kind to effectively equip course participants with a comprehensive overview of all aspects of developing and delivering **simulation-based programs**; from the preparation needed behind-the-scenes, to the skills required to clinically supervise trainees and provide feedback.

Do you have a new simulator but need some ideas on how to use it? Have you got access to a simulation facility but don't know where to begin with designing simulation-based programs?

THEN THIS COURSE IS FOR YOU!

COURSE OVERVIEW AT A GLANCE:

- Introduction to Simulation-based learning; where have we been, where are we going?
- Course Design, Scenario Design
- Props and Preparation, Console Operation
- Clinical supervision – how do you measure performance? How do you judge trainee performance in a simulated environment?
- Giving feedback
- Supervision of Skills & Drills
- Strategies for delivering & facilitating 'Pause and Discuss' Scenarios
- Strategies for debriefing scenarios that are videotaped

VENUE

The Southern Health Simulation Centre
Monash Medical Centre,
Moorabbin Campus,
823-865 Centre Road,
Bentleigh East,
Victoria, 3165

PROGRAM COST:

\$4000 (incl GST)

DATE & TIME:

26th – 30th Sept 2011

ENQUIRIES / PROGRAM ENROLMENT:

Jennifer Hogan, Manager

PH: (03) 9928 8314
